Amendments to the claims:

Please cancel claims 22-30 and amend the claims as follows:

Claims 1-30 (Canceled)

- 31. (New) A transmission comprising:
 - a housing;
 - a bearing mounted in said housing;
- a differential gear provided with a case having at least one longitudinally disposed fluid passageway, disposed in said case:
- a pair of axially aligned driven shafts disposed coaxially with said bearing, drivingly connected to said differential gear disposed therebetween;
- a hollow drive shaft receiving one of said driven shafts therein, provided with a fixed pulley and an axially displaceable pulley thereon;
- a guide member affixed to said drive shaft, journaled in said bearing and drivingly connected to said differential gear case, provided with means including an expandable chamber for displacing said displaceable pulley, and at least one fluid passageway communicating with said chamber; and
- a conduit inserted in openings in said guide member and said differential gear case, intercommunicating said passageways therein.
- (New) A transmission according to claim 31 wherein said conduit extends through the inner opening of said bearing.
- 33. (New) A transmission according to claim 32 wherein said conduit is disposed adjacent an inner race of said bearing.
- 34. (New) A transmission according to claim 32 wherein said conduit includes an annular flange interposed between said guide member and an inner race of said bearing functional to preclude longitudinal displacement thereof.
- (New) A transmission according to claim 31 including an annular seal between said conduit and said differential gear case.
- (New) A transmission according to claim 31 wherein said driving connection between said guide member and said differential gear case comprises a splined connection.

37. (New) A transmission according to claim 31 wherein said differential gear comprises a Torson differential gear, said driven shafts are drivingly connectable to wheels of a motor vehicle and the transmission ratio is controlled by the supply of a fluid to said chamber through said passageways and said conduit.
